

# The Lifters

(A Newsletter of The Pebnic Group)

## EDITOR'S NOTE

As we roll out this maiden edition of "The Lifters" we are so excited about the envisioning and motivation that our newsletter will bring to all employees of PEBNIC but more importantly to educate you on your careers and possibilities available in this ever changing world. We would celebrate achievements and individuals as you are all valuable to the PEBNIC group.

We promise to take you always on a fun ride at every issue of this publication as the overriding goal is that we LIFT each other up through this newsletter. Have a good read.

Peace O. Nwoke

## CAREER TALK TODAY! (No Goals, No Glory)

In hockey and soccer you need goals to win. A goal is the result of successful effort. No goals, no win, no glory. In business, no goals, no glory. In life, no goals, no glory.

You must set goals for yourself. The time management books insist goal setting is the first step in getting control over time. Goals shape your plans, direct your energies, and focus your resources.

You must write down your goals in your idea notebook. You should have at least two sets of goals; one set for your business career and one set for your life. Your goals should have twenty-five, ten, five, and one-year timetables. Your one-year goals should be broken down into twelve monthly steps. The month should be parceled into weekly steps.

You must create a yearly, monthly, weekly, and daily "To Do" list. On your "To Do" list write the things you have to do to reach your goals. On your daily "To Do" list, put some action that will get you closer to your long-range goals. This will keep you targeted.

If you don't have goals, you won't get them. Goals beget goals.
